

The shaking of the vehicle as it drives across the Grizzly® Trackout Control Device knocks dust, mud & other debris off the vehicle tires and chassis, which would typically be tracked out on to the roadway.

**Trackout
Control Device**

Concerned about County Citations?

The Grizzly®
Trackout Control Device
is a method to control
trackout accepted
and approved by
county agencies!

Trackout Control Device

- 🐾 Minimize trackout from your jobsite
- 🐾 Patented method to minimize the tracking out of dirt, mud, dust and debris*
- 🐾 Recognized innovation that is an improved method to control trackout at construction sites or anywhere an unpaved dirt roadway abuts or tracks dirt onto paved roadways
- 🐾 Reusable, transportable, & can be expanded to any length required
- 🐾 Reduce the cost of clean-up on the road
- 🐾 Promote a safe construction site by slowing exiting traffic
- 🐾 Help control Particulate Matter (PM10) to help improve air quality

*Patents: #6,981,818 #6,881,006 #7,059,799 & more patents pending
